Ventilation system and its types

Clean and fresh air is the component of health. Desirable that it surrounds a person not only on the street in the city of Merriam, but also at home or at work. With this allow to cope. For subdivision of ventilation systems into types there are several ways. The first can be called the principle of functioning. It can be of supply, exhaust and combined type. In the first case, the ventilation system serves just an influx of fresh and purified air from the street, which pushes polluted from the room through doors and window openings. The principle of operation of the exhaust system is understandable to many on the example of kitchen hoods, without which no apartment in Merriam can do. In this case, the system sucks polluted air, ventilation for cooking hood. Supply air ventilation, on its help, polluted air is removed from the room, passing stipulated degrees of purification. However, the best type of ventilation is combined, which combines the supply and exhaust systems. Thanks to it, the processes of outflow of polluted and influx of fresh air are combined.
